

# Neurology for the Boards

This new Second Edition features a format of detailed outlines with diagrams and algorithms that provide the framework for study and self-testing. Chapters cover clinically important aspects of neurologic diseases and syndromes. The book continues to provide a concise, methodical review of the core material candidates must master for boards. All outlines are updated, and expanded outlines include those on EEG, EMG, and spinal cord injury. Current information is also given in the areas of neurologic drugs, genetics, and recent advances in ataxia, tremor, and other diseases.
