

## Emotions of a Woman

It is a theory that women's minds are very complex. This author believes differently. Like their counter the male; women love, they suffer loss, have self-esteem issues, and are always on the path to find what truly makes them happy. My belief is the only thing that separates the two, are the way they process the same thoughts. The creator of this book wants to take you on a journey. This journey is filled with love, heartache, finding peace, suffering, loss, acknowledging their beauty, realizing the strength within, and finding true self. My target audience is this woman. However, I do invite the man who seeks the abilities to understand the ones they love so much, to know the emotions of a woman.
