

The Five Fires

Like his works *The Dreamsters* and *The Stone Kyrielle*, the premise of Michael Bradac's *The Five Fires* defies classification. Star-crossed lovers Tasha Orlov and Jason Moorhouse fight a fascist government and an unending war from two ends, neither knowing who is ally or enemy. It's a war story without a war, a love story between two people who have never met, a story of loyalty and betrayal, the valor of the vicious and the sins of the innocent. It delineates the essential role that consciousness plays in creation, and defines humanity's place in eternity. This is a mystery story, intricate, subtle, and rewarding, which keeps the reader rooting for its heroes, and guessing who those heroes are until the very end. *The Five Fires* empowers without preaching and examines morality without judgment, while restoring hope and resurrecting faith for all who read it.
