

The Early Republic and the Sea: Essays on the Naval and the Maritime History of the Early United States

Part I, Maritime Commerce and the Sea Services, covers the diversity of naval and maritime operations during the period. Subjects treated include smuggling in New England, the American model for the China trade, the undeclared naval war with France, the controversial attack by an American warship on a British merchantman shortly after the end of the War of 1812, and adjudicating the slave trade. Part II, James Fenimore Cooper and the Birth of American Maritime Experience, includes four essays devoted to the great American literary figures involvement in historical controversy, contributions to writing naval history and sea fiction, and the inspiration provided by his own nautical experience. Together the eleven essays constitute a powerful statement about the current strength and potential of early American maritime studies.
